Education

BITS Pilani, K K Birla Goa Campus — Goa, India
B.E. Electronics & Instrumentation Engineering — *Oct 2022 – Jul 2026*

Experience

Forward Deployed Engineer — Bengaluru, India
Gnani.ai — *Jun 2026 – Present*

- Built **Gnani Agent Studio**, internal platform for BFSI voice agent configuration: structured QA flow captures user answers and generates system prompts modularly; each section built per product type (Personal Loan, Vehicle Loan, etc.) and call flow scenario (PTP, third-party collections), optimized for KV caching; embedding-retrieval + LLM-confirmation (Azure OpenAI GPT-4o); FastAPI/MongoDB + React/TanStack.
- Developed voice agents for Airtel (collections, DTH) and L&T Finance; multi-language support with optimized API integration and call pipelines.
- Won **2nd prize among all FDEs** in Gnani.ai's company-wide Agent Hackathon.

AI Agents Developer — Bengaluru, India
100x — *Aug 2025 – Dec 2025*

- Built AI agents for candidate sourcing (TrueSearch), NetSuite workflows, QA/UAT testing (80% manual effort reduction); JavaScript-based automation; optimized for reliability and long-running execution.

Google Summer of Code 2025 – Contributor — Remote
Internet Health Report — *May 2025 – Aug 2025*

- Enhanced **IYP Browser** with Vue.js frontend for Neo4j graph exploration; real-time node expansion, Cypher autocompletion, embeddable widgets, accessibility visualizations with Plotly.js.

Projects

Conversa: AI Lead-Gen Chatbot SaaS | *FastAPI, Next.js, LangChain, pgvector, Supabase* — Feb 2026

- Multi-tenant RAG SaaS: users paste website URL, FastAPI backend crawls and indexes content into pgvector, live chatbot answers visitor questions via embedded widget and captures leads.
- Built retrieval pipeline (HTML/PDF/DOCX to text chunks to embeddings to vector index) and LangChain agent with lead-capture tooling, hardened against LLM failure modes with 12 unit tests; secured multi-tenant auth with Supabase + JWT and deployed on Render.

JustExecute: AI Startup-Validation | *LangGraph, Groq, Tavily, Node.js, Supabase* — Dec 2025

- Full-stack AI platform: one-sentence idea to market-validation report + 90-day GTM in **<2 min** (**$5K–15K** consulting value); 5-stage LangGraph state machine with parallel Tavily searches feeding structured JSON through each stage.
- 6 custom LangChain retrieval tools grounding all claims in Reddit/HN evidence; SSE streaming for live progress; Supabase Auth + Postgres quota system + guest trial path.

Vouch: Portable Performance Record for Developers | *React, Convex, Hermes Agent, Dodo Payments* — Jul 2026

- Built "credit score for engineers" platform: employers submit performance reviews to Hermes Agent converts free-text to structured JSON with 6-dimension Vouch Score (0–100); consent-gated two-tier data model, Dodo subscription payments, Convex role-based auth with employee reply rights.

Technical Skills

Languages: JavaScript, Python, C++, HTML, CSS, SQL
AI/ML: LangChain, LangGraph, Embeddings, Qdrant, RAG, Prompt Engineering
Frameworks/Tools: Express.js, React.js, Vue.js, Node.js, PostgreSQL, Supabase, Neo4j, Firebase, Tailwind CSS, Git
Concepts: Data Structures & Algorithms, OOP, Database Design

Extracurriculars

Built a strong LinkedIn presence with **4,000+** followers, consistently sharing technical insights on AI, startups, and software development.
